

INFORMATION SHEET

Multi Zone Distributed PA System.

Communication in a large venue can become a hassle without a well designed and thought out system. A multi zone distributed audio system is used for medium to large sized venues. When you require the flexibility to have different sound sources in different areas of the building, whilst still enabling total system control, a multi zone PA system is used. Bendigo Audio Visual can design a

system to suit your needs whilst providing detailed instructions and training on how to get the most from your new system.

There are many different types of zoned audio systems to choose from. These range from the basic, bush button select a source for each zone system, to the advanced computer programmed digital matrix systems which can be fully automated and controlled via touch screen. We can provide a solution for you that enables to routing power to give your system the flexibility when needed but more importantly the easy of use that most end users require.

We specialise in upgrading or expand your existing systems, with causing very minimal downtime to the everyday running of your venue.

- ✓ **Zone areas which are grouped to physical buildings or functions which different areas provide.**
- ✓ **Always allow for future expansion in your system.**
- ✓ **Consider EVAC and ALERT override functions.**
- ✓ **Remember to include less common areas; Toilets, Staff Rooms, Kitchens...**
- ✓ **Consider Australian Made quality products.**
- ✓ **Choose energy efficient equipment.**
