

INFORMATION SHEET

Places of Worship Audio Visual Systems.

When it comes to presenting your message at your place of worship, a reliable and easy to use communication system is needed. Bendigo Audio Visual has the solution for your AV requirements, whether you're after a system upgrade or a brand new flexible designed system. We can design a

system to suit your needs and required budget whilst providing detailed instructions and training on how to get the most from your new system. Some venues will only require a Basic Audio Speaker system, but your imagination is the limit as to what can be achieved with customised lighting, video projection, and sound reinforcement.

Because every organisation's needs are different there will be different requirements to be considered when designing and installing your system. Some options we cater for include;

- Motorised screens,
- Wall mounted LCD/LED screens,
- High Quality Band Sound Audio,
- Touch screen control systems,
- Hearing enhancement devices,
- Desk and Floor connection boxes,
- Video and Audio conferencing,
- General Stage and Effects Lighting,
- Atmosphere Effect machines,
- Multi Screen Matrix System.

We can also upgrade or expand existing systems. With today's technology it's up to your imagination as to what can be achieved.

- ✓ **Discuss the needs of the system with the end user.**
- ✓ **Consider installing smart control systems which reduce long term operational hassle.**
- ✓ **Choose power saving and energy efficient equipment.**
- ✓ **Allow for future system expansion.**
- ✓ **Consider Australian Made quality products.**
